

Training School

Agroforestry systems in temperate and dryland ecosystems

29th June 2020 to 10th July 2020

– pattern and processes

Hosted by the Albert-Ludwigs-University Freiburg, Germany

Participants from southern Africa and Europe will learn about various examples of agroforestry systems in both African and European settings. Students will learn about the dynamics and interactions that occur between tree, crop and/or livestock in both physical and social realms. The course will include theoretical sessions, excursions and practical tasks. The language of instruction is in English.

12 places available for MSc, PhD and Post-doc students from southern Africa
- Mobility grants for flights, accommodation and sustenance available
